Editorial v

Research papers

On overland flow modelling: Can rainfall excess be treated as independent of flow depth?
B.H. Schmid (Vienna, Austria). 1
Salt intrusion model for high-water slack, low-water slack, and mean tide on spread sheet
H.H.G. Savenije (Arnhem, The Netherlands) 9
The effect of irrigation rate on solute transport in soil during steady water flow
J.S. Dyson (Riverside, Calif., U.S.A.) and R.E. White (Palmerston North, New Zealand) 19
Prediction of nitrate leaching from a structured clay soil using transfer functions derived from externally applied or indegenous solute fluxes
R.E. White (Palmerston North, New Zealand). 31
Numerical analysis of large diameter wells with a seepage face
R. Sakthivadivel (Madras, India) and K.R. Rushton (Birmingham, U.K.) 43
A simple empirical model of root water uptake
N.J. Jarvis (Uppsala, Sweden) 57
Particle travel times of contaminants incorporated into a planning model for groundwater plume capture
R.M. Greenwald and S.M. Gorelick (Stanford, Calif., U.S.A.). 73
The utility of climatic station data in making hourly potential evaporation estimates for remote sensing studies
M. Owe (Greenbelt, Md., U.S.A.). 99
Global peculiarities and tendencies in river discharge and wash-down of the suspended sediments — The earth as a whole
G.P. Tamrazyan (Baku, U.S.S.R.). 113
An evaluation of the factors determining the effectiveness of water quality buffer zones
J.D. Phillips (Greenville, N.C., U.S.A.) 133
Isotope studies of precipitation and groundwater in the Sierra de las Cruces, Mexico
A. Cortes (Mexico, Mexico) and R.N. Farvolden (Waterloo, Ont., Canada) 147
The behaviour of dissolved uranium in groundwaters of the Morro do Ferro thorium deposit, Brazil
D.M. Bonotto (São Paulo, Brazil) 155
Groundwater chemistry and cation budgets of tropical karst outcrops, Peninsular Malaysia, I. Calcium and magnesium
J. Crowther (Dyfed, U.K.) 169
Numerical modeling of a multi-aquifer system in eastern Saudi Arabia
M. Rasheeduddin (Riyadh, Saudi Arabia), H. Yazicigil and R. Al-Layla (Saudi Arabia) 193
Analysis of the shallow groundwater flow system near Connetquot Brook, Long Island, New York
K.R. Prince (Menlo Park, Calif., U.S.A.), T.E. Reilly (Reston, Va., U.S.A.) and O.L. Franke (Syosset, N.Y., U.S.A.). 223
The calibration of frequency-domain electromagnetic induction meters and their possible use in recharge studies
P.G. Cook, M.W. Hughes, G.R. Walker and G.B. Allison (Glen Osmond, S.A., Australia) 251
An engineering solution to the nitrate problem of a borehole at Swaffham, Norfolk, U.K.
K.M. Hiscock, J.W. Lloyd, D.N. Lerner and M.A. Carey (Birmingham, U.K.) 267
Assessment of groundwater potential for conjunctive water use in a large irrigation project in India
S.K. Sondhi (Ludhiana, India), N.H. Rao and P.B.S. Sarma (New Delhi, India) 283
Characterizing flood-prone rice areas and predicting flooding hazards
R.C. Undan, S.I. Bhuiyan and M.M. Agua (Manila, Philippines) 297

Water flow in a hummocky landscape in central Saskatchewan, Canada, I. Distribution of water and soils
B.J. Zebarth (Guelph, Ont., Canada) and E. de Jong (Saskatoon, Sask., Canada) . . . 309
Approche stochastique de l'hydrodispersion en milieu fissuré — Variabilité du coefficient de dispersion (Stochastic approach of the hydrodynamic dispersion in a fractured medium — Variability of the dispersion coefficient
E. Carlier et Gilles Porel (Villeneuve d'Ascq, France) 329
Évolution du covert de neige et des profils hydrique et thermique du sol dans un bassin de la sapinière Laurentidienne (Evolution of the snow cover and of the soil hydrological and thermal profiles in a basin of the Laurentidian balsam fir forest)
M. Prévost (Sainte-Foy, Qué., Canada), R. Barry (Edmunston, N.B., Canada), J. Stein and A.P. Plamondon (Laval, Qué., Canada) 343

Discussions

Log-logistic flood frequency analysis — Comment
B. Bobée and F. Ashkar (Sainte-Foy, Qué., Canada) 367
Log-logistic flood frequency analysis — Reply
M.I. Ahmad (Faisalabad, Pakistan), C.D. Sinclair and A. Werrity (Fife, Scotland) . . . 370
Indices of hydrological drought in Israel — Comment
H.L. Striem (Rehovot, Israel) 373
Indices of hydrological drought in Israel — Reply
A. Ben-Zvi (Jerusalem, israel) 374

Announcement 377
